

Project Name:

Type:

Catalog#:

EXB is a high efficacy LED high bay luminaire designed for industrial and commercial interior lighting.

It has such a clean low-profile look that even satisfies retail commercial applications thanks to its hidden cooling fins and integrated sensor design.

Construction:

- Compact die cast aluminum housing.
- Superior heat sinking with hidden Air-Flow fins.
- IP65 for wet and damp locations.
- Integrated occupancy sensor.

Mounting:

- Spring lock hook & eye ring for chain suspension mount.
- Pendant mount.

Electrical:

- High Power Factor, low THD UL listed driver with 5KV surge protection.
- Universal line voltage input 120-277V, 347/480V optional.
- 0-10V dimmable.

Optical:

- Standard wide beam lens 120 degrees.
- Narrow beam 90 degrees lens optional.
- Prismatic Ploy reflector optional.
- Wide Beam Aluminum reflector optional.

Controls Options:

- Integrated Bi-Level Occupancy sensor.
- Wireless Wi-Fi networking control.
- Emergency backup.

Warranty:

- 5 years warranty for complete fixture.

Ambient:

- 40°C to 55°C

Dimensions:

Photometrics (Contact us for layout design)

(Standard 110° wide beam Lens)

(Aluminum Reflector Lens)

(Polycarbonate Reflector Lens)

Emergency Version (for all models)

Features:

- Meets safety standards for EM lighting, UL 924.
- Battery protections include over charge protection, over discharge protection & short circuit protection.
- Emergency driver & battery are built inside fixture internally.

Electrical:

- Universal line voltage input 120-277V, 347/480V optional.

Battery:

- Li-ion battery-14.8V/2000mAH, last for 90 minutes.
- Charging time 24 hours.

Operation:

- When AC power goes out, the emergency driver detects the AC power outage and will automatically switch to emergency mode. The green indicator will turn off. Fixture will drop from full brightness to 3,000 lumens.
- When the AC power is restored, the emergency driver will return to AC power working mode and starts re-charging. Green indicator will turn on. Fixture will return to full brightness.

EM Specifications:

Output Lumens	Output A	Output V	Output Watt	Duration	Capacity
3,000 lm	310-600mA	25-48VDC	15W	90 minutes	14.8V/2000mAH
